Features

Dual Screen

Dual screen is for the comfort of the speaker and operator both to coordinate with each other.

Adjustable Prompt Speed

This is for the speed handling of the story scrolling on the teleprompter.

Anchor Message

Message your anchor in real-time without interrupting the flow of news.

Live Editing

Prime Supports editing of the text that is being aired on the teleprompter in real-time.

Cloak Text

Mark the text that is not yet confirmed, and it will be hidden on prompter.

Bookmarks

Jump across and within stories to pre-defined anchor points.

Multi-lingual

Samvad teleprompter supports free mixing of fonts and languages. It supports unicode as well as TTF fonts.

Dual Screen:

Dual Screen in itself defines that there are two screens; one with the operator and other one with the speaker with same story running on them

Import Word/Html:

HTML files and Word files can be imported in Samvad using .html format files and .docx format files respectively.

Import .Txt Files:

Text/Scripts can be imported in Samvad using .txt format files.

Font Size Selection:

Command to change the font size of the story text in prompting.

Mirrored/ Unmirrored Prompting:

User can click on the mirrored option to view the story text/Slides in mirrored form

Story Progress Bar:

To know the progress or how much story has been passed while playing.

Prompt PowerPoint:

In Samvad teleprompter versions the content of the slides are prompted on to the talent screen.

Bracket Handling:

You can Select different-different colors for Parenthesis/bracket by simply Selecting the desire color Option from color selection window given adjacent to the Parenthesis in the table.

Prompting Images/Scans:

Some Samvad versions also support prompting of Images. In these versions the Images are prompted on to the talent screen.

Date-time Show on TP:

Date and Time are displayed on the top right-corner of the teleprompting screen.
